Installation advice

To give the grass maximum stability, it is recommended to spread the carpet with special dried silica sand: approx. 5-10 kg/m².

Unique fibres with an unrivalled appeal

Since the beginning of this century, Royal Grass® has been focusing exclusively on artificial grass for landscaping. The brand has a reputation of being one of the most innovative brands in the world. Among other things, it has developed the V-shape and the revolutionary MiNT® technology. These innovations give the grass its unrivalled resilience, a natural glow and a unique softness.

The backbone strengthens the fibre to keep it nicely upright.

Borrowed from nature: the patented V-shape.

Micro nerve technology gives the fiber a mat, silky colour and strongly reduced reflection.
